

OrtCloud

OrtCloud GmbH (<http://www.ortcloud.ch>) is a commercial internet service provider and Local Internet Registry with full RIPE membership. OrtCloud operates from three carrier neutral, Swiss data centers in Zurich, Bern, and Biel which meet the Uptime Institutes Tier IV standards. Access is limited to OrtCloud personnel via two factor/biometric access control and monitored 24/7 by video surveillance. All OrtCloud data centers feature:

1. N+1 UPS and battery and generator equipment for power and cooling redundancy
2. Cold-Aisle containment infrastructure for server racks
3. A&B power pulled from independent transformers directly connected to the local power utility
